

# S.T.E.M STORY TIME

## Sensory S.T.E.M for 3K & PreK

STEM STORY TIME takes big scientific concepts and breaks them down into small pieces connecting simple vocabulary and hands-on exploration through story, song, and movement. This engages children's logical and conceptual brains with their imagination and bodies, incorporating all the ways children learn. We explore concepts such as light, water, gravity, motion, magnets, sound and more. Classes can be stand-alone experiences or incorporated into existing 3K and PreK curriculum.

Emma Gordon is the creator of Science Baby Playshops, an artist, performer, educator and a licensed DOE vendor. Prior to creating Science Baby, Emma was an in-school teaching artist in the NYC public school system for 12 years. The heart of Science Baby is exploring the wonder of science through story and play for infants to 3 years of age. STEM STORY TIME is the evolution of those Playshops for a slightly older age group and catered to the classroom environment.

Program Cost: \$120 per 45 min class (\$480 for a 4-week series or \$960 for a 8-week series)
