

S.T.E.M + STORY

Sensory S.T.E.M for 3K, PreK & Kindergarten

In a STEM + STORY class, children learn big ideas through story, play and hands-on experiments. We break down concepts such as light, water, gravity, motion, magnets and sound in a way that is interactive and experiential. Classes can be stand-alone experiences or incorporated into existing 3K, PreK & Kindergarten curriculum.

Emma Gordon is the creator of Science Baby Playshops, an artist, storyteller, educator and a licensed DOE vendor. Prior to creating Science Baby, Emma was an in-school teaching artist in the NYC public school system for 12 years.

The heart of Science Baby is exploring the wonder of science through story and play for infants to 3 years of age. STEM + STORY is the evolution of those Playshops for a slightly older age group and catered to the classroom environment.
